 - a. Students select the Quantum Mechanics (I)&(II) offered by Institute of Physics, and both grades of two semesters should be higher than the passing grade.
 - b. Students select the Electrodynamics (I), and the grades of the semester should be higher than the passing grade.
 - c. When applying for course transfer, PhD students may simultaneously apply for qualification examination by submitting the application form and an official and complete transcript. The primal review by the course instructor and then the second review by the course committee determine whether the applicants pass their qualification examination.
 - d. If a Ph.D. student's grades of selecting courses are less than the passing grade, or if the course allowed to be transferred has not reached the level of qualification examination, he/she should audit the same courses offered by Institute of Physics (including submitting homework and joining examinations) to acquire the grades with the "pass" criteria. The Ph.D. student should acquire the approval of the course instructor in advance and report the situation to the Curriculum Committee.
 - B. Adviser can also request Ph.D. students to join GRE physics (advanced) examination. The pass criteria is higher than (or equal to) 70% of all (if the Ph.D. student's grade is between 60% and 70%, the student should be strongly recommended by the adviser and approved by the Committee of Institute Affairs.)
2. Oral examination: to test if the Ph.D. student is fully prepared for his/her research topics and fields.

Applicants should prepare 2-5 pages of English documents of dissertation proposal according to their research topics and fields, and submit the proposal to Institute Office two weeks before the oral examination for application. Time of oral examination is 60-90 minutes. The members of oral examination will raise related issues according to the documents. The pass criteria of oral examination is winning over half of the members' agreement through voting.
 - B. Three to five members of oral examination will be invited by the adviser (all members should be teachers of Institute of Physics), who should attend the oral examination but cannot join the voting.
 - C. The oral examination should be applied for at most twice.
3. If a Ph.D. student has passed all written examinations in the fourth semester, in order that the student can fully prepare the research direction, under the adviser's approval, the deadline of oral examination can be extended to the end of the fifth semester.
4. Ph.D. students who pass the PhD candidate qualification examination are Ph.D. candidates.

Article 5 Doctoral degree defense

1. The Ph.D. degree defense should follow the "Regulations for Master and Doctoral Degrees Conferment" of NCTU, unless otherwise prescribed by

- regulations stipulated by Institute of Physics.
2. A Ph.D. student who applies for doctoral degree defense in the semester should submit the application recommended by the adviser before one and a half months before the oral defense (the applicant can contact the assistant for related documents of oral defense application). In order to meet the requirement of current educational system, Ph.D. students' degree defense should be conducted within degree defense schedule of every semester according to the school calendar. If an extension is needed, the degree defense should be conducted before January 31st in the first semester, before July 31st in the second semester. As of Academic Year 2019, any student who conducts the oral defense shall first complete the "thesis originality check" and submit the result to the members of the oral defense committee.
 3. All oral defenses must be conducted openly. The time and place of the oral defense and the title of dissertation/dissertation must be announced in advance.
 4. The committee for the doctor degree oral defense is made up of five to nine members. Their qualifications are verified by Institute Teacher Evaluation Committee. The director of the Institute should submit recommendations by petition to the principal of NCTU for approval to issue appointment letters to committee members and the chairperson. Internal and external members should account for one-third or above.
 5. All members of an oral defense committee must attend the oral defense in person. Stand-ins are not permitted. An oral defense for doctoral degree should be attended by at least five committee members.
 6. The passing grade and full marks of the oral defense are 70 and 100. An oral defense is deemed failed when over one-third of present committee members evaluate the performance as failed. The score of oral defense is determined by the average signed scores given by present members.
 7. Students who fail to pass the oral defense and whose extended study period hasn't reach its limit may apply for the retrial from the next semester to the limit of their study period. Retrial is limited to be once only. Students who fail to pass the retrial of degree defense are required to drop out of NCTU. NCTU will confer a master degree upon a doctoral student who passes the Ph.D. candidate qualification examination (COM) but fails the Ph.D. oral defense if the dissertation is approved by the oral defense committee as qualified for a master degree.
 8. Doctoral dissertation (including abstracts) must be written primarily in Chinese or English and comply with the NCTU Format for Thesis/Dissertation. Students are required to post electronic versions of the abstract and the entire thesis on the university website within one month after passing the oral defense (practiced according to NCTU Library Abstract, Thesis and Dissertation Electronization Specification). Students must also submit four hardcopies of their dissertation (one hardback copy and one paperback copy submitted to Institute of Physics for collection, one hardback copy displayed in NCTU library, and one paperback copy submitted by the Office of Academic Affairs to the unit of archive appointed by MOE for collection).

Article 6 The Regulation is based on the Article 2 of Regulation of NCTU. Regulations of graduate students' study should be reviewed in order by the Curriculum Committee of College and by Curriculum Committee of University, and then

submitted to Academic Affairs Meetings for approval before practice.
